

2Rider Electric Operation manual

Step 1:

Turn on the battery power at the back of the seat stay. The power is supplied independently to both side of drivetrain.

**Step 2:**

Turn on the power switch (top photo: driver side bottom photo: passenger side) and the 2Rider is ready to ride. Press the button at top left to switch the power output (L(low)-M(mid)-H(high)).

Check the battery indication:

Press the button on top of the battery to see the signal is strong (3 green light and 1 red light) or weak (red). Use the battery charger included to charge 3 to 5 hours when the battery signal turns red only.

Battery installation / removal:
Turn the key to unlock the battery, slide left to remove.
