

Birdy

Mudguard user manual

Mudguard setup

Step 1:

Do sub-assembly of front and rear mudguard first.

Rear mudguard

Front mudguard

Step 2:

Remove both front and rear wheels and put the bike upside down on smooth and clean floor.

Step 3:

Tighten the three bolts (one at front end and two at L/R mudguard holder) to hold the rear mudguard in place.

Step 4:

Assemble the front end to front fork as illustrated, note the black spacer in between.

Assemble the rear spokes to front fork, adjust distance between mudguard and tire, tighten the screw again.

Step 5:

Put both front and rear wheels back, tighten the QR lever and re-wire the brake.

Now your bike should look like this:
